A.2

DATE: **13 JUN 1986**

SUBJECT: Diamond Shamrock Site Compliance Audit - Priority 1 request

FROM: William H. Sanders III, Director  
Environmental Services Division

TO: Basil G. Constantelos, Director  
Waste Management Division

The Eastern District Office (EDO) will provide the requested support for Dan Bicknell's Priority 1 - Diamond Shamrock survey scheduled to be conducted June 17, 18, and 19, 1986. EDO laboratory analyses for approximately 50 hexavalent chromium samples will be done according to the methodology and quality assurance procedures as specified in the Consent Order. The requested pH meter along with any needed sampling equipment will be made available. Arthur Gedeon of the EDO staff will assist in sample collection, documentation, and sample deliveries to the EDO laboratory.

As agreed, during Dan Bicknell's telephone conversation with EDO on June 4, 1986, the hexavalent chromium data sheets from the EDO laboratory will be supplied to him within a week after sampling. Dan has also made additional arrangements to ship the total chromium samples to CRL where they will be analyzed on a Priority II basis.

If there are any further details to be worked out, please have Dan contact Rich Winklhofer at FTS 942-7260.
